Professional Summary

Front-End Developer specializing in TypeScript and modern JavaScript frameworks, with solid experience building scalable web and mobile applications using React, React Native, Next.js, and Vue.js. Experienced in creating high-performance interfaces, implementing responsive and accessible user interfaces, and collaborating effectively within agile, cross-functional teams. Strong focus on clean architecture, maintainable code, and delivering user-centered digital experiences.

Experience

Front-End Developer | Hubchain Technologies (2023 - Present)

Developed and maintained fintech platforms related to digital banking and cryptocurrency.

Built reusable UI components using React, TypeScript, and Storybook, improving consistency across products.

Collaborated with backend and product teams in an agile environment to deliver new features end-to-end.

Front-End Developer | Freelancer (2022 - Present)

Developed web and mobile applications using React, React Native, and Next.js.

Created UI/UX prototypes and interface designs using Figma.

Developed, maintained, and integrated REST APIs using Node.js.
